Walter,

In response to you email below, as stated in Blue Spike's letter sent on April 30, 2014, Blue Spike is seeking the following source code:

- All software and firmware source code related to the asserted claims, including all program files, library files, and compiling files. If relevant code exists in prior versions, produce those as well.

In advance of reviewing the source code, it will be necessary for our attorneys to review the following documents:

- All files and documents related to said source code, including, but not limited to, all internal and external documentation regarding the source code, including all readme files, specifications, pseudocode, flow charts, and other descriptions of the operation of the source code.
- All files and documents related to modifications of said source code, including, but not limited to, all change requests, emails regarding said modifications, and other relevant specifications and documentation.
- All files and documents related to testing of said source code, including, but not limited to, bug tracking logs, unit tests, emails regarding said tests, and other relevant test specifications and documentation.

Please provide dates and times for each of your respective, remaining clients so that Blue Spike can review the above referenced source code. Given the court's expedited discovery schedule time is of the essence.

Regards,

Peter Brasher / Attorney

Peter,

My apologies on the delay in getting back to you re: scheduling of source code review. We are in the process of working with our clients regarding this issue.

As you know, we represent the following defendants as lead counsel:

- BMAT Licensing, S.L.
- Fulcrum Biometrics, LLC
- NFUROtechnology

...
- Futronic Technology Co., Ltd.

- IriTech, Inc.

- M2SYS, Inc.

- iPharro Media, Inc. and iPharro Media GmbH

Could you provide some specificity as to what type(s) of source code Blue Spike is requesting?

Best regards,

Walter
